What Kind of Care Is Right for Me?

When an unexpected illness or emergency happens, it is important to remember that as a Prominence Medicare Advantage member you have several options for where you can go for care.

Prominence Health Plan contracts with specific providers, urgent care facilities and hospitals to provide in-network healthcare services. For more information, refer to our online directory at [ProminenceMedicare.com](https://www.ProminenceMedicare.com). Understanding your provider network can reduce your out-of-pocket costs significantly. In the event of a serious or life-threatening emergency, call 9-1-1 or go straight to the nearest ER.

YOUR PRIMARY CARE PROVIDER (PCP)

Your PCP can diagnose, treat and manage healthcare problems, coordinate services, and track your health and wellness. Your medical condition will typically determine how often you should see your PCP. Those with chronic medical conditions are usually seen routinely every three to six months. - Treat patients with lacerations, sprains, back pain and other injuries
- Help manage chronic conditions, including hypertension, asthma, diabetes and high cholesterol
- Conduct routine health exams and physicals
- Treat anxiety, depression and other mild to moderate behavioral health conditions
- Perform screening and diagnostic tests
- Discuss treatment options and make recommendations for the most appropriate care
- Give acute care for symptoms such as high fever, stomach pain or cough

Where To Get Care?

Make the right choice when your PCP is not available. You have access to quality, convenient healthcare.

Provides access to board-certified doctors, pediatricians and behavioral health specialists by phone or video 24-hours a day, every day of the year. Some of the things that can be treated are:

Prominence Health Plan Care Management Team

Healthcare today can be confusing, especially when dealing with serious or complex illnesses. Each person has a unique situation and personal set of goals and ideas.

Care Management is a process used to identify and coordinate the appropriate aspects of individualized care. The goal of care management is to help you manage your health and bring about a better quality of life.

Prominence offers this program to members who might need extra help managing complex health problems and/or in navigating the healthcare system. This program is offered at no cost to Prominence Health Plan members and is voluntary. If you decide to participate, you can opt out at any time. Opting out does not affect your health plan benefits.

The care management program allows you to work closely with a care manager, who is a Registered Nurse or a Licensed Clinical Social Worker. The care manager can assist you in figuring out ways to make changes to your health, ensure that all your healthcare providers understand your needs, and help you deal with some of the stresses that may be interfering with you achieving your healthcare goals. We will assess your needs and work closely with you and your physician(s) to create a care plan to help you improve your overall health.

Your care manager will be in regular contact with you to check how your plan is working and, with your input, make changes if needed. As your health improves and you gain confidence in your own self-management, care management services will no longer be necessary.

In order to qualify you must complete a health risk assessment. To learn more about our care management program, please call our Care Advocate team at **1-855-969-5882 (TTY: 711)**.
